

# Colocation Server

*Cost-effective, Easy, Save,  
Secure and Maximal*

## INTRODUCING JUPITER

Jupiter is a managed services provider with focus on data protection, data safety, data storage, colocation and cyber security also provide services such as dedicated servers, cloud computing, private rack, private cage, fast content delivery (CDN), live streaming delivery (LSDN) and connectivity for cloud providers at affordable, reliable and good quality.

## JUPITER COLOCATION SERVER

Colocation is a service that lets you store your mission critical servers, network equipment, and storage in advanced data centers. Essentially, you rent the space for your IT assets while still maintaining total ownership and control.

## KEY BENEFITS

- ◆ Hot Aisle and Cold Aisle Containment System (HCACS), more energy efficient.
- ◆ Unmetered Local Network Traffic up to 1 gbps.
- ◆ Unmetered Global Network Traffic up to 25 mbps.
- ◆ Administrator on duty 24/7 for emergency maintenance.
- ◆ 24/7 GREAT Support, why hire if you can use us.
- ◆ Electricity Coverage by UPS System and Power Backup Generating Set.
- ◆ Raise Floor System Coverage all Datacenter Area.
- ◆ Biometrics, Face Recognition & RFID Access Security.
- ◆ Integrated Fire Protection System.
- ◆ CCTV Coverage All Datacenter Area.
- ◆ Smart Portal (Integrated Billing, Ticketing, MRTG, etc).
- ◆ Include **FREE Basic JMS™** (Jupiter Managed Services):
  - ✓ FREE Standard Installation.
  - ✓ FREE Primary and Secondary DNS.
  - ✓ FREE Web Acceleration (CDN) traffic usage 10GB.
  - ✓ FREE Reserved DNS / PTR Record Request.
  - ✓ FREE Remote Hand & Eyes Monitoring.
  - ✓ FREE Reboot & Power Cycling.
  - ✓ FREE Proactive Monitoring.
  - ✓ FREE Basic cPanel / DirectAdmin Tuning.

## WHY JUPITER

### COST-EFFECTIVE

Cost-effective server colocation for small server numbers. Connect your own equipment to our network in the same way as a dedicated rack – with the same benefits.

### MAXIMAL SECURITY

Our multi-layered security policies include access system with individual authentication using finger print biometric, Smart Card Proximity, CCTV equipment, and security officers who guard throughout 24/7. For security, we're the colocation provider of choice.

### HYBRID CAPABILITIES

One service does not necessarily fit all when it comes to colocation options. That's why, unlike many other colocation providers, we give you the opportunity to combine traditional colocation with dedicated servers and cloud computing environments to create a tailored solution.

### 24/7 ON-SITE ENGINEERS

As part of our colocation service, certified and highly qualified engineers are available 24/7 to perform diverse tasks at your request, including server reboots, network testing, cable replacements, and regular exchange of backup tapes or other removable media.
